

# OdourVac®

## Toilet Ventilation System

**FANTECH**  
**Plus**

# Creates an Odourless Toilet

***The OdourVac Toilet Ventilation System has been designed to discreetly solve the embarrassing problem of toilet odour in a quiet and unobtrusive manner.***

It works by removing toilet odours directly from the bowl, leaving the room fresh and welcoming. Odours are drawn from the toilet bowl and into the cistern's own overflow pipe and are exhausted by the ducted ventilation system to outside the home.

By targeting the source of the odour, the OdourVac system only needs to run while the toilet is in use. This may save power and running costs, as conventional ceiling fans have to operate longer due to odours spreading to a larger area before being extracted to the outside. It also avoids the need to use expensive deodorisers, which simply disguise the problem, rather than remove it.

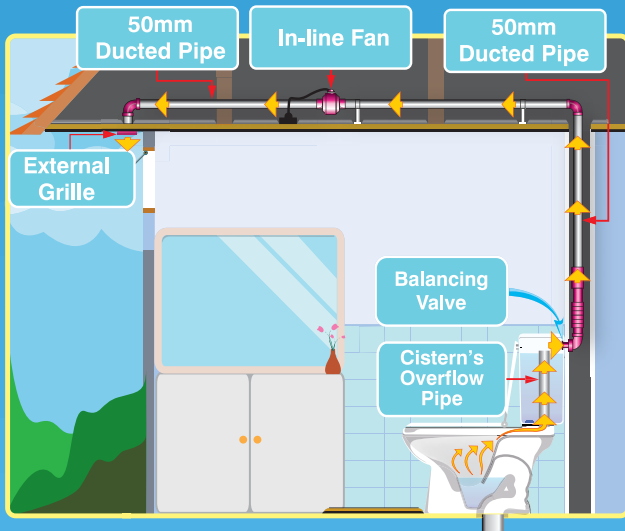

#### **The system is available in two configurations:**

- Extracting odour from one toilet, with the **OVK1 kit**.
- Extracting toilet odour and shower vapour from an ensuite, using a separate ducted fan system and the **OVK2 add-on kit**.

#### **Features include**

- Creates an odourless toilet by removing odours directly from the toilet bowl
- Adjustable air flow ensures odours are removed without draft
- Quiet and out-of-sight solution
- Compatible with most toilet suites

## Extracting odours from one toilet - OVK1

The OVK1 includes all the components required for one toilet installation - just add the length of 50mm PVC pipe.

### Fan (TEF100)

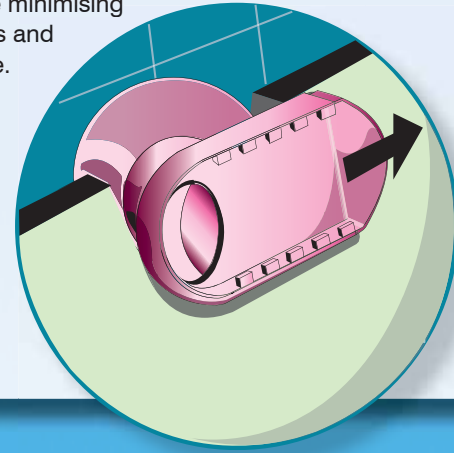

The fan is supplied with a 3-pin plug and lead and is easily activated by using either a light switch, a separate switch or a movement sensor (switches purchased separately).

### Fan Specifications

230-240V, 50Hz, 16W

### Balancing Valve

Both systems (OVK1 & OVK2) feature a balancing valve that is fitted within the toilet cistern. It adjusts the air flow to maintain a fresh odour free environment while minimising drafts and noise.

Products highlighted in pink are included in the OVK1 kit

## Extracting toilet odour and shower vapour - OVK2

The OdourVac OVK2 add-on toilet ventilation kit is designed to be installed with one of four ventilation systems. Please choose the installation type that best suits your requirements and refer to the component list below:

Ducted In-line Installation	Ducted Through Roof Installation	Ducted Through Wall Installation	Ducted In-Wall Installation
<p><b>Components required</b></p> <p>OdourVac Toilet Ventilation kit Code: OVK2</p> <p>In-line duct fan kit Code: ILK150 or ILK150HP (6m of flexible duct and ceiling grille are included with the in-line duct fan kit)</p> <p>50mm PVC pipe</p>	<p><b>Components required</b></p> <p>OdourVac Toilet Ventilation kit Code: OVK2</p> <p>Ezifit Thru Roof fan Code: ECE152 or ECE154</p> <p>Flexible duct Code: DUCT150-6MPK (6m length)</p> <p>Ceiling Mounted Grille Code: RCG150 or RCG200-150</p> <p>50mm PVC pipe</p>	<p><b>Components required</b></p> <p>OdourVac Toilet Ventilation kit Code: OVK2</p> <p>Ezifit Thru Wall fan Code: EWE152 or EWE154</p> <p>Flexible duct Code: DUCT150-6MPK (6m length)</p> <p>Ceiling Mounted Grille Code: RCG150 or RCG200-150</p> <p>50mm PVC pipe</p>	<p><b>Components required</b></p> <p>OdourVac Toilet Ventilation kit Code: OVK2</p> <p>Ezifit In-Wall fan Code: EIE150</p> <p>Flexible duct Code: DUCT150-6MPK (6m length)</p> <p>Ceiling Mounted Grille Code: RCG150 or RCG200-150</p> <p>50mm PVC pipe</p>

Products highlighted in pink are included in the OVK2 kit

Installation of the OdourVac systems may require additional components such as PVC bends and flexible ducting.

## Compatibility

The OdourVac system works with most toilet suites. To check if your toilet is compatible, visit [www.fantechplus.com/odourvac](http://www.fantechplus.com/odourvac)

## Compliance

The system complies with AS1668.2-2002 (section 5.2.1) and BCA 2010 (Part F).
